Medicare Set-Asides and Medical Cost Projections

The Medicare Compliance Group at Dickie, McCamey & Chilcote offers clients a wealth of experience handling complex Medicare Set-Asides (MSAs) and Medical Cost Projections (MCPs). Our team of attorneys, legal nurse consultants, and Medicare compliance professionals utilize a legal and medical-based approach that is novel in the industry. We are nationally recognized as results-oriented practitioners, focused on helping clients achieve substantial cost savings when their claims require an MSA or MCP.

The professionals in our Group undertake a thorough review and evaluation of liability and workers' compensation settlements for MSA allocations. In doing so, we critically analyze the medical records to ensure that only the costs associated with the injury in question are allocated for the proposal. Our Group understands that clients are looking to us to prepare and submit MSAs that gain rapid Centers for Medicare & Medicaid Services (CMS) approval at the lowest possible figures.

As part of our practice, our team advises clients on both day-to-day and more complex Medicare requirements to make certain that all issues are properly addressed. When MSA-related problems and challenges arise, we are prepared to see the matter through to the conclusion. We serve as the voice and advocate for our clients, working to ensure that their interests are fully protected at every phase of the process.

The members of our Group provide clients with accurate and individualized direction on MSA funding and administration. We also help our clients develop effective compliance protocols, audit existing protocols, provide guidance on how to train their staff members, and how to implement and adjust Medicare compliance procedures.
